1. DISASSEMBLY

Note: Follow the disassembly procedure in the numerical

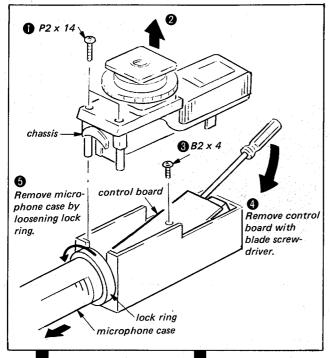

order given.

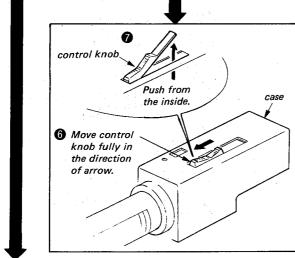

Control board removal: 1-4

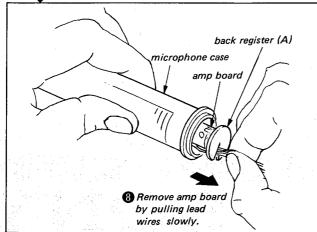

Volume knob removal: 1-4, 6, 7

Amp board removal:

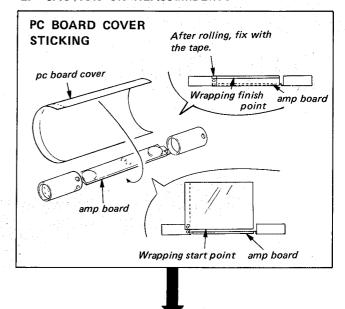

0-6, 8

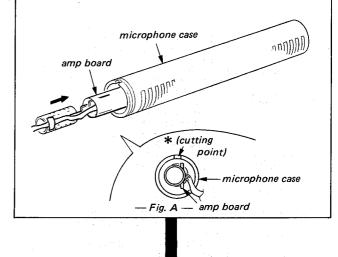

2. CAUTION ON REASSEMBLING

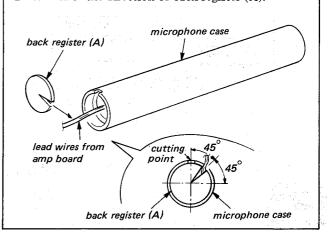

AMP BOARD POSITION SETTING

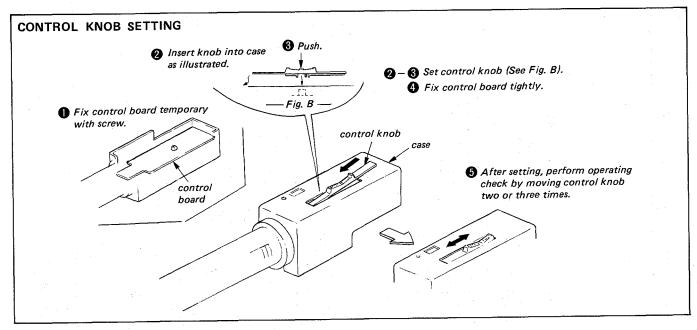

Set amp board into the microphone case by pushing it vertically to the cutting point (*). (See Fig. A.)

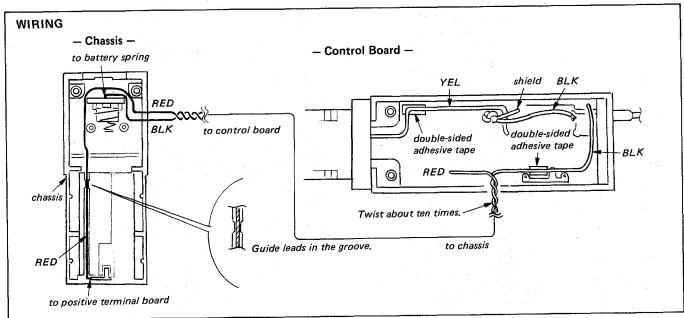

BACK REGISTER (A) INSERTION

Be careful of the direction of back register (A).

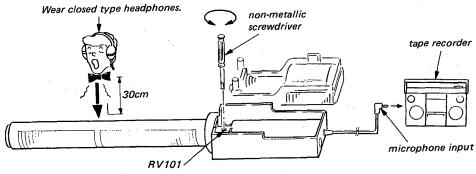

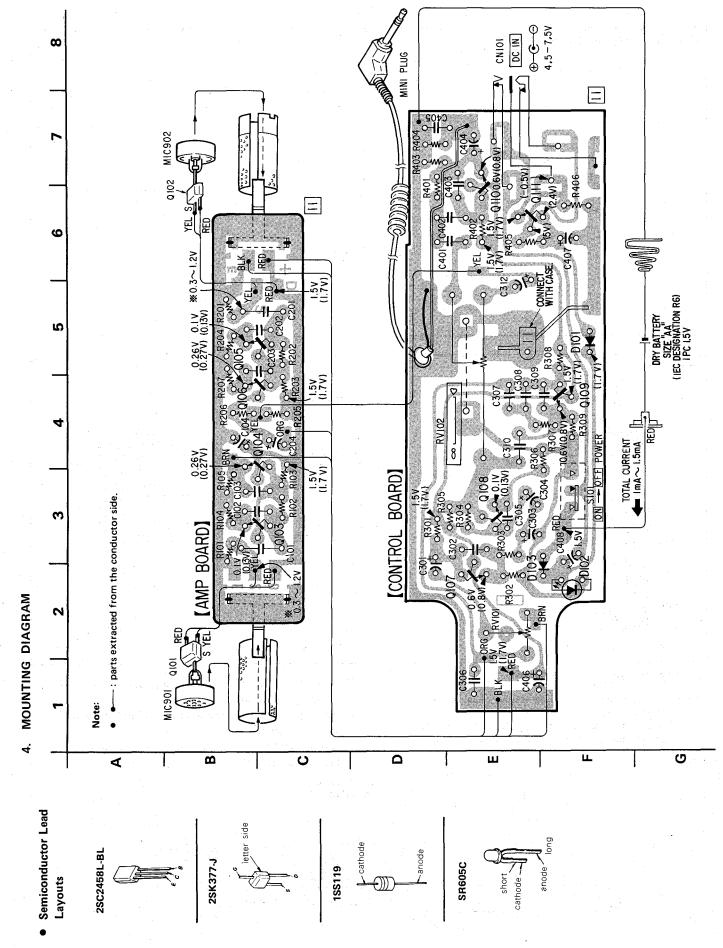

3. DIRECTIVITY ADJUSTMENT

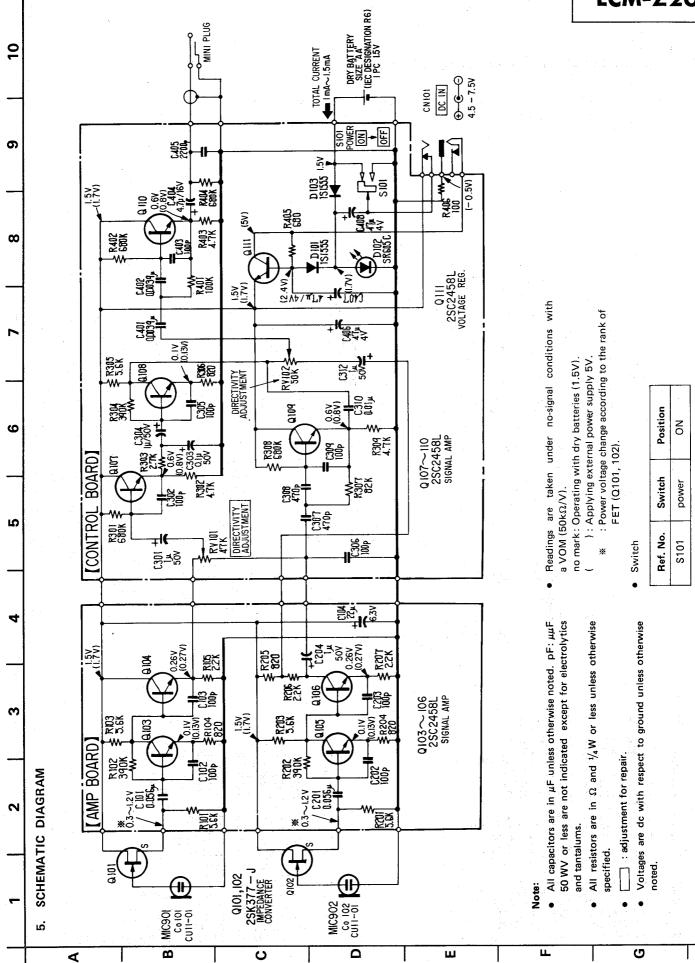

Note: This adjustment should be made when replacing following parts.

Microphone capsule, FET (Q101, 102), RV101, parts on amp board (except for C102, 103, 202, 203).

- ① Connect ECM-Z200 to the microphone input of the tape recorder.
- ② Apply your voice to the microphone unit at right angle as shown.
- 3 Adjust RV101 to obtain minimum output from headphone output.

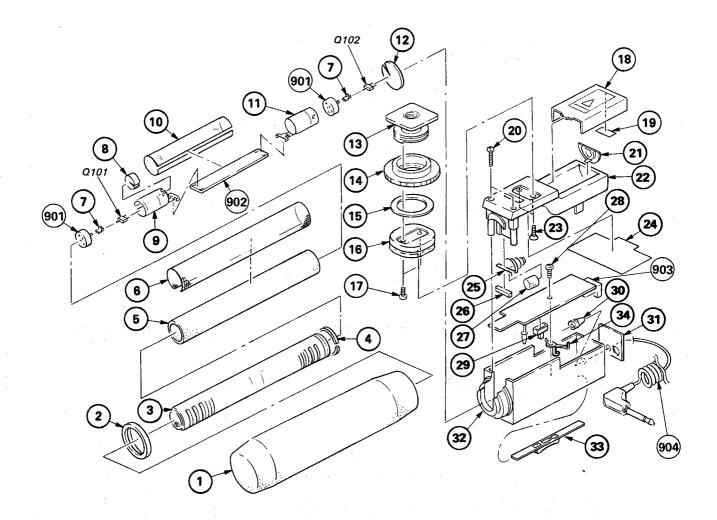

6. EXPLODED VIEW AND PARTS LIST

NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
